

Paddle Type Flow Switch

Item Code: HLS-61MB

HLS Series liquid flowing through the pipeline flow changes, such as water, ethylene glycol, or other non-hazardous liquids. When the liquid flows over a single-pole double-throw switch contact, it makes a loop turn-on, while cutting off other loop the flow switch is commonly used for stop protection sites.

Characteristics:

- Liquid Pressure up to 1 Mpa
- Adjustable set point the user may adjust according to trim the flow value.
- HLS61MB type with fully closed structure, for electrical equipments are effective protection against dust and water vapor.

Application:

In freezer system when cooling water dries up, HLS can be effectively cut off the compressor current.

Specification:

Electric loading : AC 250 V, 10A

M. Working Press. : 10.34 Bar

Protecting Std. : IP63
